UNIVERSITY NEWS

Meet the President - Mary Adams

Mary Adams wound up in higher education by accident—but she wouldn’t change a thing about her path. In late 2004, Mary became president at the American Graduate School of Management—American Sentinel’s predecessor, which later merged with the American College of Computer and Information Sciences.

All along the way, Mary has focused on providing students what they need to succeed. “In every decision we make, we first consider its effect on students. American Sentinel really does care. And the unsolicited feedback we get shows that students feel that.”

As president, Mary handles all of American Sentinel’s regulatory compliance and accreditation issues. Since 2008, she has served on the accrediting commission of the Distance Education and Training Council—American Sentinel’s nationally recognized accrediting agency—and is currently vice chair.

“Distance education truly does make it possible for people to improve their lives. I once had a student say, ‘When the kids went to bed, I went to school,’ and I think that captures it.”

MESSAGE FROM STUDENT SERVICES

Are you using all of your resources?

If you have not logged into NetTutor yet, you’re missing out! This complimentary service is staffed by expert tutors who are available to answer any question about any subject. Additionally, you can submit a paper and receive constructive feedback within 48 hours. This ensures that the assignment you turn into your course has been carefully edited and revised.

Check it out:

1. Visit NetTutor
2. Click “Register Now” in the top left corner of your screen
3. Create a User ID for yourself, and fill in the rest of the required fields
4. A password will be sent to your e-mail address
5. Return to the NetTutor website, use your User ID and password, and log in
6. Begin a live tutoring session, submit a paper, or submit a question

Don’t forget that your student advisor has plenty of resources such as APA templates, information on PERRLA, and archived webinars. Also, contact your student advisor if you’re interested in attending this week’s webinar on Wednesday, July 18th, at 8p.m. EST: “Take a Write Turn: Exploring the Writing Process.”

**CAREER CORNER**

Get Connected, Get Visible: Build Career Opportunities With LinkedIn [Webinar Replay]

Using LinkedIn helps you create visibility for potential employers, it also helps you build your personal network and can eventually help you land that job you’ve had your eye on.

If you’re not a LinkedIn pro, don’t worry, most job seekers aren’t! Check out our webinar to get valuable tips and a six week action plan that will set you up for career success on LinkedIn! Watch Now.
### TECHNOLOGY NEWS

**GIS Boosts Hospital Business Plans**

Hospitals using GIS technology gain a significant competitive advantage: real-time patient data that helps them make better decisions. GIS enables hospitals to understand how patients choose doctors, hospital locations and medical specializations. In addition, hospital decision-makers are increasingly utilizing GIS knowledge to control costs, identify prospective customers and simplify payment options.

See for yourself how today’s GIS technologies are changing the face of the trillion-dollar healthcare industry. [Watch Now.](#)

### HEALTH CARE NEWS

**Virtual Chat — Infection Prevention & Control: The Next Hot Nursing Career**

Never before has the field of infection prevention and control been more important. According to Joy Green-Hadden, Assistant Dean, Health Sciences and Nursing, the career outlook for this specialty is exceptionally bright. However, the knowledge, skills, planning, strategies, and activities required for this specialization are exceptionally advanced and complex – and very much in demand.

This live Q&A is hosted by [NurseTogether.com](#) and American Sentinel University, and will present a one-of-a-kind opportunity for you to ask questions and learn

---

**REGISTRATION**

Registration is open for courses beginning in August and September!

The July and August terms are currently open for registration. Check the [academic catalog](#) to find out what courses you can take in the next two terms that will help you complete your degree.

**BUSINESS NEWS**

**Learning from LinkedIn’s Data Breach**

Early in June 2012, there were reports of hackers leaking 6.5 million user passwords. LinkedIn was responsible for the data breach, as well as not adequately encrypting the data so hackers could easily find what they were looking for.

If a business keeps significant data on customers—and which ones don’t?—it is vulnerable to data breaches. Size doesn’t matter. [Read More.](#)

**MILITARY NEWS**

**The Epicenter for Military GIS Operations**

More than ever before, the U.S. military is relying on GIS technology and those with GIS degrees. And the most important cog in this GIS wheel is the U.S. Army Geospatial Center. The U.S. Army Geospatial Center’s coordinates and synchronizes geospatial information requirements across the Army, while developing geospatial enterprise-enabled systems for the Department of Defense. It also provides direct geospatial support and products to Warfighters. Much of what the center works on is classified and will not be known for decades. But, here’s a look at a few accomplishments in recent years. [Read more.](#)
